Features

Internet

Enable your customers to browse the World Wide Web.

Email

Our email service allows your customers to send emails anywhere in the world.

110 Exciting Games

With 5 great categories the Silverball machine houses over 110 different games.

Great Prizes

From stand alone to link the Silverball machine is able to run tournaments over any desired period.

Linked Tournaments

The Silverball network enables us to link from 2 to 200 machines together in a variety of different configurations thus offering larger prizes.

You share in the benefits

25% of Total Turnover

One quarter of all turnover is yours to keep. You will have full access to accounting information and Statistics enabling you to see just how well the Silverball machine is performing.

Shared Internet Costs

The Silverball machine will be connected to the internet via wireless Communication. If you're currently paying for an internet connection, speak to us about a shared arrangement for your site, saving you money on monthly access fees.

Value Adding

Statistics from other Silverball installations has shown that having a Silverball machine installed in close proximity to the bar increases bar revenue.

Advertising & Promotions

You have the ability to run internal promotions and advertising as easily as typing on a keyboard. Add pictures and video which can all be displayed whilst the machine is in stand by mode.

You share in the success

Revenue Allocation

The revenue from the machines is split into 4 main categories

- **Site Share:** 25% of the turnover will be paid to the Site on the day of clearance, accompanied by a tax Invoice.
- **Operators Share:** 25% of the turnover will be retained by the Operator.
- **Prize Pool:** 40% of the turnover will contribute to the prize pool.
- **Operating costs:** 10% of turnover will be used to fund administration and operating cost e.g. Internet access and promotions

PC Based Machine infrastructure

Silverball machines are reliable and operate on a standard PC based hardware and software platform.
